

Department of Molecular Genetics and Microbiology  
Stony Brook University

2006 Undergraduate Summer Research Program

Ken-Michael Bayle (D. Thanassi lab)

Imaging Pilus Assembly in *E. coli*

Timothy Furphy (N. Carpino lab)

Possible PDE in the Sts-1 and Sts-2 Proteins

Jenny Lam (J. Konopka lab)

The Ts Degron: A Systematic Approach to Creating Temperature-Sensitive Proteins in *Candida albicans*

Janice Shih (W.-X. Zong lab)

Cancer and Cell Death

Langdon Smythe (N. Reich lab)

Regulation of STAT1 Nucleo-Cytoplasmic Localization

Rebecca Solomon (G. Viboud lab)

Mutational Analysis of Multifunctional Protein YopD of *Yersinia pseudotuberculosis*
