

1 Visit—3 Vascular Screenings That Could Save Your Life.

Aneurysms and strokes can strike suddenly and without warning. That's why it's best to identify and treat underlying causes before symptoms appear.

Performed by a vascular technologist during a single visit, the three FREE tests include:

- **Carotid ultrasound**, to check for clogged carotid arteries in the neck, which can lead to stroke
- **Abdominal aortic ultrasound**, to test for aortic aneurysms, which can burst if reaching a large size
- **Ankle-brachial index**, to check for PAD or peripheral artery disease that is often a sign of heart disease

The screening process for all three tests is quick—about 10 minutes for each test—and painless.

As a service to our community, we're now offering these screening tests *at no cost*.

It's just one more way Stony Brook University Medical Center stays on the forefront of keeping you healthy.

Call (631) 638-2100

Telephone pre-registration and a brief qualifying interview **are required**.

No walk-ins accepted.

Your primary care physician will receive a copy of the report. Those with positive test results will be able to discuss the results immediately with our specialists, and follow-up appointments can be made on site.

Quick and Painless Screenings

Free at Stony Brook

Are you 55 or older? Do you have one or more of the following risk factors for an aneurysm, stroke or vascular disease?

- **Current or past smoker**
- **High blood pressure**
- **High cholesterol**
- **Diabetes**
- **Heart disease**
- **Family history of aortic aneurysm**

If so, register for one of our FREE vascular screenings:

**Saturday, July 16,
or Saturday, September 17
8 am to 4 pm**
