Global Women’s Health Program

OUR MISSION:

To train the next generation of women’s health providers for a career in global health through a comprehensive and multi-faceted education program.

Through our initiatives on the ground, we aim to empower healthcare providers in the Caribbean (Haiti) and sub-Saharan Africa (Rwanda) to provide high-quality, evidence-based medical services to women and girls through education, clinical and research capacity building activities.

Global Women’s Health Track

OB/Gyn Residents in this program participate in a comprehensive educational program including:

- Didactic learning
- Simulation based training
- International clinical experience
- Rwanda
- Haiti
- Research
- International collaborative learning
- Real-time capacity building workshops

Mentoring teams consisting of an OB/Gyn resident and global health faculty member will design, prepare and implement a capacity building or research oriented project during the program.
