

International Research Fellowship

Grant Application Deadline: March 1st

Open to matriculated students in the School of Medicine

Office for Global Medical Education

Name:

Class of:

Email address:

Title of Proposal:

Stony Brook Project Mentor/P.I. (include title and department affiliation):

Email address:

International Site Mentor/P.I. and Institutional Affiliation:

Email address:

Project Summary: Provide (attachment in Word format, not to exceed 3 pages) a description of your research project proposal. Include background based on literature review, importance and rationale of project. Describe methodology, human subjects' protocol (if relevant), methods of data collection and analysis, and your role in the project. Specify if the project has already been formulated and activated by the international site P.I., or if the project is one of your own design. Note if a foreign institutional IRB approval has been obtained.

Timetable and Outcomes: Specify an approximate timetable for your participation in the project with goals and benchmarks. If you plan to complete data collection during your 2 month elective, indicate a timetable for data analysis. If the project will not be substantially completed during your elective, indicate if you will participate in interim data analysis or will continue with the project until completion. Note if you plan to develop a publishable abstract or paper based on this work, and give a timetable for completion of the abstract/article.

Budget: Provide a budget that accounts for approximate costs of round trip economy airfare, insurances and immunizations, and includes the \$45/day living allowance, with a maximum of 60 days/\$2400 per diem allowance. The usual total budget is \$3500 but in no case may the budget exceed \$5,000. Expectation is that the project will require a 6 week commitment, give or take 2-3 days.

Extramural Funding: Please list any other sources of funding that you have applied for to support this activity. If you have received an award please attach the budget details. In general, extramural awards reimburse eligible expenses before intramural funds may be utilized.

Does the project involve human subjects?: Y N If so, then IRB approval will be required prior to beginning the project.

Personal Statement: Please describe any prior research experience, international experience (not including vacation travel), foreign language(s), interest in global medicine, and your reasons for applying for this fellowship (attachment in Word format, not to exceed 1 page).

Two Letters of Support: One letter of support is to come from your Stony Brook mentor and one from your International Site mentor.

Signature: _____ Date: _____

Please submit all documents including letters of support in electronic format to Kimberly Malamutt in the Office for Global Medical Education (Kimberly.Malamutt@stonybrookmedicine.edu) no later than March 1, (unless date has been adjusted due to annual calendar). For questions regarding the application you may contact Mrs. Malamutt or Dr. Mark Sedler (Associate Dean for Global Medical Education).
