

Clinical Geriatric Quality Improvement Research Workshop

Wednesday, October 23, 2024, from 8:00 AM to 1:15 pm in HOSPAV 4W-0101B.

Sponsored by the Center for Healthy Aging at Stony Brook

Intended audience includes faculty, fellows, medical students and graduate students

Medical Grand Rounds (Live and Virtual)

8:00-9:00 AM Dr. Shari Ling, MD, Deputy Chief Medical Officer for the Centers for Medicare and Medicaid Services and Medical Officer in the Center for Clinical Standards and Quality (CCSQ)

CMS Initiatives to Promote the Delivery of High-Quality, Patient-Centered Care for Patients with Multiple Chronic Medical Conditions

Center for Healthy Aging Quality Improvement Research Workshop

9:05-9:15 Welcome and Introduction of Guest Speaker

Dr. William Wertheim, MD, MBA, Executive Vice President Health Sciences Center, Professor of Medicine

- 9:15-9:35 AM *Quality Improvement Research as a Scholarly Activity*

Dr. Shari Ling, MD, Deputy Chief Medical Officer for the Centers for Medicare and Medicaid Services and Medical Officer in the Center for Clinical Standards and Quality (CCSQ)

9:35-10:45 AM *Round Table Discussion of Stony Brook's Resources for Clinical Research:*

- Eric Morley, MD, MHA, MS, CPHQ, FAAEM, Chief Quality Officer: **Moderator**
- Rebecca Dahl, PhD, CIP. Assistant VP, Research Compliance, Research Integrity Officer **Institutional Review Board Policies, Procedures, Website, Waiver of Consent – when ok**
- Andria Adler, Manager, Clinical Award Administration Office of Scientific Affairs **Grants Management/Budgets**
- Jie Yang, PhD, Biostatistical Core, Associate Professor Preventive Medicine **Biostatistical Consultations for determining best study design, power analysis, and required statistical tests**

- Silvia Muniz Assistant Director for Clinical Trials Office of Scientific Affairs
Resources for Clinical Trials
- Jessica Koos, Interim Head of Health Sciences Library at Stony Brook University
Dryad as a resource for data for secondary analyses; clinical trial data, imaging databases, epidemiologic data
- Cyrille David, Assistant Vice President/Chief Research Information Officer Innovation and Research Services **Informatics, IT support and proper data storage**

10:45-11AM Coffee Break

- 11 AM-12:45 Interactive Case Presentations by Faculty, Fellows, and Graduate Students with Feedback by Expert Panel
Moderator: Suzanne D. Fields, MD, Professor of Medicine, Division Chief, General, Geriatric and Hospital Medicine, Interim Co-Director, Center for Healthy Aging

Expert Panel to include panel above PLUS:

- Shari Ling, MD, Deputy Chief Medical Officer for the Centers for Medicare and Medicaid Services and Medical Officer for the Center for Clinical Standards and Quality (CCSQ)
- Sean Clouston, PhD, Director of Research for the Program in Public Health
- Hants Williams, PhD, Director of Scholarship, Innovations and Analytics for the School of Health Professions
- Lauren Hale, PhD, Director of PhD Program in Population Health and Clinical Outcomes, Program in Public Health

Review of research proposals related to quality improvement in clinical care for older adults by graduate students, fellows and faculty

Tracey Spinnato, MD, Director of Quality Improvement for Gen Med/Geri outpatient PCC practice: Will individual patient reminders improve colorectal screening in patients with Medicaid insurance?

Sanjib Dey, FNP-C, DNP student: How can primary care providers play a crucial role in improving advance care planning (ACP) conversation and documentation?

Lindsey Schacter, MD, APD Geriatric Fellowship: Does improved recognition of delirium via a validated screening instrument and implementation of a Delirium Power Plan improve inpatient delirium outcome metrics?

Beatriz Makhoul, FNP-C, DNP student: How effective is the established Collaborative Depression Clinic Model in a primary care setting in improving the identification, management, and outcome of depression among geriatric patients compared to standard mental health services and referrals?

Jeffrey Penny, MD, Geriatric Fellow: Do diversional activities in a Snoezelen room for high fall risk nursing home patients during sun-down time reduce fall rates?

Nazia Sarker, MD, MPH Geriatric Fellow: Does moving high- risk fall patients to a special care unit with trained staff to provide support for ambulation, hydration and closer monitoring, result in a decreased rate of falls among older adults in a long-term care facility?

Anshu Singh, MD, Medical Director LISVH: Will a one-year structured behavioral health training program equip direct care staff with the tools to manage disturbing behaviors in nursing home residents and de-escalate challenging situations? Will such training improve staff satisfaction and retention? Will it impact quality indicators for the facility?

12:45-1:15 Lunch, Opportunity for Networking
