### **Responsible Department/Division/Committee:**

Graduate Medical Education Committee

### **Policy:**

Stony Brook Medicine (SBM) has an institutional policy regarding the certification/recertification of Advanced Cardiac Life Support (ACLS) training.

All residents and fellows entering SBM GME training programs must be Basic Life Support (BLS) and ACLS (or PALS for pediatrics training programs) certified. All trainees must maintain BLS certification throughout their training. Pathology residents and HemePath, CytoPath, and Surgical Pathology fellows are exempt from this requirement.

Residents and fellows entering into Pediatrics training programs (core and fellowships), Child Neurology, Child Psychiatry, and Pediatric Dentistry may be certified in Pediatric Advanced Life Support (PALS) in place of ACLS.

### **Definitions:**

None

### **Procedures:**

#### **INCOMING RESIDENTS/FELLOWS:**

Incoming residents and fellows must demonstrate completion of a BLS and ACLS (or PALS) course before starting training at SBM. That course must be an American Heart Association-accredited course.

For those who do not have active certification upon entering training at SBM, a course will be made available to incoming residents/fellows during the month of June. Incoming residents/fellows must register for the course through the GME Office. Provider manuals are available to borrow from the program coordinators. The resident/fellow will provide a \$100 check which will be returned upon return of the manual. However, if the resident/fellow registers for the course and does not attend or does not return the manual, the resident/fellow will be responsible for the cost of the book and course (\$100).

#### RECERTIFICATION:

All residents and fellows must maintain their ACLS (PALS) certification for the duration of their training. Residents and fellows in the following programs are exempt from maintaining ACLS (PALS) certification throughout their training:

- Pathology residents
- HemePath, CytoPath, and Surgical Pathology fellows
- Preventive Medicine

Periodically during the year, additional courses will be made available for recertification. Residents/fellows are eligible for recertification if their ACLS certification is current. Registration is through the program coordinators and requires provision of a \$100 check. If the resident/fellow does not attend the course or does not return the manual, they will forfeit the \$100.

Program coordinators are responsible for tracking certification status for residents and fellows in their department. Coordinators will be responsible for registering residents and fellows in their department for ACLS courses to ensure proper coverage is in place. A list of courses offered at Stony Brook will be posted to New Innovations. Residents who fail to be recertified when required may be at risk for suspension or non-renewal.

#### RECERTIFICATION PRIOR TO COMPLETION OF TRAINING:

A resident or fellow with certification expiring after graduation may participate in a recertification course if there is room in the course; however, they must pay a \$100 course fee.
