Department of Molecular Genetics & Microbiology
Renaissance School of Medicine at Stony Brook University

Presents:

HARNESSING IMMUNITY TO COMBAT INFECTION AND DISEASE

SYMPOSIUM 2019

Monday, April 29, 2019 | 8:30 AM – 6:00 PM
The MART Building - Auditorium & Atrium

Bruno Silva-Santos, PhD
Institute of Molecular Medicine, Portugal
“Gamma-delta T cells: new roles for old cells”

David Sancho, PhD
CNIC, Spain
“Dendritic cells beyond immunity”

Nita Salzman, MD, PhD
Medical College of Wisconsin
“Antimicrobial peptides and bacterial niche competition in the GI tract”

Miriam Merad, MD, PhD
Icahn School of Medicine at Mount Sinai
“Harnessing the tumor myeloid microenvironment to enhance cancer care”

Thaddeus Stappenbeck, MD, PhD
Washington University in St. Louis
“New concepts in developing preclinical targets for therapy of patients with IBD.”

Ross Kedl, PhD
University of Colorado
“What infections forgot to tell us: The unexpected principles of T cell vaccinology”

Ken Cadwell, PhD
New York University
“Host adaptations to microbial diversity”
