Stony Brook Pediatrics NICU SENIOR ELECTIVE

Goals and Objectives

	Goals for this Rotation	Competencies
GOAL I:	Recognize and manage conditions seen in the neonatal ICU (NICU).	
1.	Gather essential and accurate information about the patient in a timely manner	
2.	To make informed and reasonable decisions about diagnostic and therapeutic interventions based on patient information, current scientific evidence, and sound clinical judgment a) Seek consultation services when appropriate b) Gain exposure to and practice in invasive procedures used in the care of infants in the NICU	PC, SBP
	c) Initiate and manage common therapies for the sick newborn To develop and carry out a sound patient management plan in a timely way, appropriately prioritizing management and acting as team leader	
GOAL II condition	Develop a broad knowledge base regarding neonatal physiology and	
1.	Understand the pathophysiology of common and more complex neonatal conditions	
2.	Understand use and proper adjustment of common treatments/medications	
	a) Know the risks and complications of neonatal therapies and proceduresb) Understand and properly interpret results of common tests done in the NICU	
3.	Understand the transition from intrauterine to extrauterine life, including the physiology of the term and preterm neonate	K, PC, SBP, PBLI, IPC
4.	Understand the basic techniques and procedures used by obstetricians and perinatal specialists, as well as the important maternal conditions that impact the fetus and newborn	I BEI, II C
5.	Use scientific methods and evidence to investigate, evaluate and improve one's patient care practice in the NICU.	
	a) Develop skills to critically appraise evidence from scientific studies and other appropriate literature	

information for both patients and families 7. Facilitate learning by teaching others GOAL III: Communicate effectively with families, other members of the health care team and to maintain accurate timely and appropriate medical records. 1. Use effective verbal skills to provide succinet transfer of information 2. Prepare Power Point presentations that are accurate and professional 3. Provide effective sign-out communication GOAL IV: Demonstrate knowledge, skills and attitudes needed for continuous self-assessment, using scientific methods and evidence to investigate, evaluate and improve one's patient care practice. 1. Use scientific methods and evidence to investigate, evaluate and improve one's patient care practice in the inpatient setting. 2. Identify personal learning needs, systematically organize relevant information resources for future reference, and plan for continuing acquisition of knowledge and skills. GOAL V: Demonstrate a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to liversity. 1. Demonstrate personal accountability to the well being of patients (e.g., evaluating patients and reviewing charts before work rounds, following-up on lab results, writing comprehensive notes, and seeking answers to patient care questions). 2. Demonstrate a commitment to professional behavior in interactions with staff and professional colleagues. 3. Demonstrate a commitment to tehical principles pertaining to provision of or withholding of clinical care, to confidentiality of patient information and informed consent. 4. Understand the legal and ethical dilemmas and implications in neonatology 5. Demonstrate a commitment to ethical principles pertaining to provision of or withholding of clinical care, to confidentiality of patient information and informed consent.		6. Use information technology to assist in managing					
7. Facilitate learning by teaching others GOAL III: Communicate effectively with families, other members of the health care team and to maintain accurate timely and appropriate medical records. 1. Use effective verbal skills to provide succinet transfer of information 2. Prepare Power Point presentations that are accurate and professional 3. Provide effective sign-out communication GOAL IV: Demonstrate knowledge, skills and attitudes needed for continuous self-assessment, using scientific methods and evidence to investigate, evaluate and improve one's patient care practice. 1. Use scientific methods and evidence to investigate, evaluate and improve one's patient care practice in the inpatient setting. 2. Identify personal learning needs, systematically organize relevant information resources for future reference, and plan for continuing acquisition of knowledge and skills. GOAL V: Demonstrate a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to liversity. 1. Demonstrate a commitment to professional behavior in interactions with staff and professional colleagues. 3. Demonstrate a commitment to ethical principles pertaining to provision of or withholding of clinical care, to confidentiality of patient information and informed consent. 4. Understand the legal and ethical dilemmas and implications in neonatology 5. Demonstrate a commitment to ethical principles pertaining to provision of or withholding of clinical care, to confidentiality of patient information and informed consent. 5. Demonstrate a commitment to ethical principles pertaining to provision of or withholding of clinical care, to confidentiality of patient information and informed consent. 6. Demonstrate a sensitivity and responsiveness to patients' cultures, gender,		5.

1. Understand different types of medical practices and delivery systems, including the complexities of controlling health care costs and allocating resources.

SBP

2. Understand and practice systems-based patient safety.

Core Competencies: K - Medical Knowledge

PC - Patient Care and Procedural Skills

IPC - Interpersonal and Communication Skills

P - Professionalism

PBLI - Practice-Based Learning and Improvement

SBP - Systems-Based Practice
