

# Nephrology Rotation Expectations

## Pediatric Nephrology Rotation

Throughout the next 2-4 weeks the resident will be involved with seeing patients in the outpatient setting, performing consults on the inpatient units (heme/onc, floors, PICU, NICU) and attending any extra nephrology conferences that may arise during your rotation. You will be given a set of nephrology questions to be completed at the start of the rotation which will be discussed with the attending on service.

Contact the nephrologist on call before the start of your rotation.

1. Rotation contact information: Room 060. Administrative Assistant is Ms. Madeline Hernandez 444-7884.
2. Consults: Consults will be completed and presented to the on-call Attending. Residents are expected to go to clinic each morning and clinical work will be delegated based on the current day's balance of outpatient/inpatient needs and optimization of resident education.
3. The clinics are at Commack and Lake Grove.
