

Suggested acknowledgement section language

If there were arterial lines:

The Stony Brook University PET Research Core performed radiosynthesis of <fill in radiotracer name(s)>, acquisition of imaging data, arterial input function sampling and measurement and metabolite analysis.

If there was no arterial line:

The Stony Brook University PET Research Core performed radiosynthesis of <fill in radiotracer name(s)> and acquisition of imaging data.

Suggestions for authorships:

Authorship should be determined by the rules of the journal first. Then, investigators might consider including radiochemists as coauthors if:

- This was the first use of a tracer at SBU
- The chemists developed a new synthesis procedure different from literature methods
